

Following the numerous previous attendances at Samoter, and being aware of the multi-disciplinary nature required today to identify the best project and executive solution for working in tunnels, *Società Italiana Gallerie* proposes facing the different topics of specialisation referring to the methods of excavation and support, with *traditional methods, based on the equilibrium of the mass* (ADECO), *mechanised whole section cutting systems* (TBM) and also the *safety* and attention to the *environment* in the creative and operational stages at this conference.

Like other exhibitions in the European offices of analogous associations, the associations of France (AFTES), Spain (AETOS) and Switzerland (GTS) which, like SIG, recognise themselves in the International Tunnelling Association (ITA-AITES), will take part in the organisation in ascertaining the advanced globalisation of the sector.

The leading experts of the sector, actuators, large businesses and machinery and technology manufacturers, and all those who have committed themselves to ensure the best use of the 'subsurface' as an inalienable resource for sustainable development are taking part in this traditional appointment.

Programme

Wednesday, 5 March 2008
Sala Rossini

- 13,00 Registration of participants
- 14,00 ***Opening of proceedings***
- Adolfo Colombo** (Presidente Soc. Ital.na Gallerie)
Luigi Castelletti (Presidente VeronaFiere)
